

# Chip To A Box Chipping Game

**Goal: Chip 20 balls consecutively into a box.**

**Set-up: Using several clubs or tees, create a box behind a hole on the chipping green. Give yourself plenty of green to work with, this game is for a chip & run shot.**

**How to play: Use 20 balls and attempt to hit 20 balls consecutively into the square. Any ball that misses the square means that you have to collect the balls and start again. Make the square smaller after you reach 20. Keep a record of the size of square (measured in PW lengths) and your best score.**

**This square is very small. I recommend measuring a square by 1 club length each side of the hole and 2 club lengths deep**

Short Game	Scores						
Size of square	1st Score	2nd Score	3rd Score	4th Score	5th Score	6th Score	7th Score

**Each attempt must beat the last score to count and be added to your score sheet**

**When you get 20 balls into the square, make the square smaller and start again**
